

Electricity savings served up for a state-of-the-art padel facility

Business Background

We began working with Surge Padel in 2025, shortly after becoming the official utility partner of The Padel Directory. Surge Padel is raising the game when it comes to padel tennis in the UK, developing premium indoor padel centres featuring top-tier courts and world-class facilities.

Objectives

- Secure a competitive electricity supply contract to support their growing energy needs.

What We Did

Our partner team worked closely with Surge Padel to get a clear understanding of their energy consumption, operational goals, and site-specific requirements. We then served up a fully managed electricity supplier tender.

ELECTRICITY

Customer Star rating

Results

By taking control of the procurement process from start to finish, we were able to ace a competitive zero carbon electricity contract, delivering savings of **£3,696** compared to the renewal quote from their existing supplier.

Customer Quote

“Consultiv Utilities really smashed it. Their turnaround on pricing was fast and professional, and they helped us understand exactly what each tariff covered—no strings attached. Their expert advice and sharp negotiation meant we landed a much better deal than our previous supplier was offering, and the fact that the electricity contract was zero carbon was the icing on the cake. A winning partnership from start to finish!”
